

Asteroidal Occultation Census

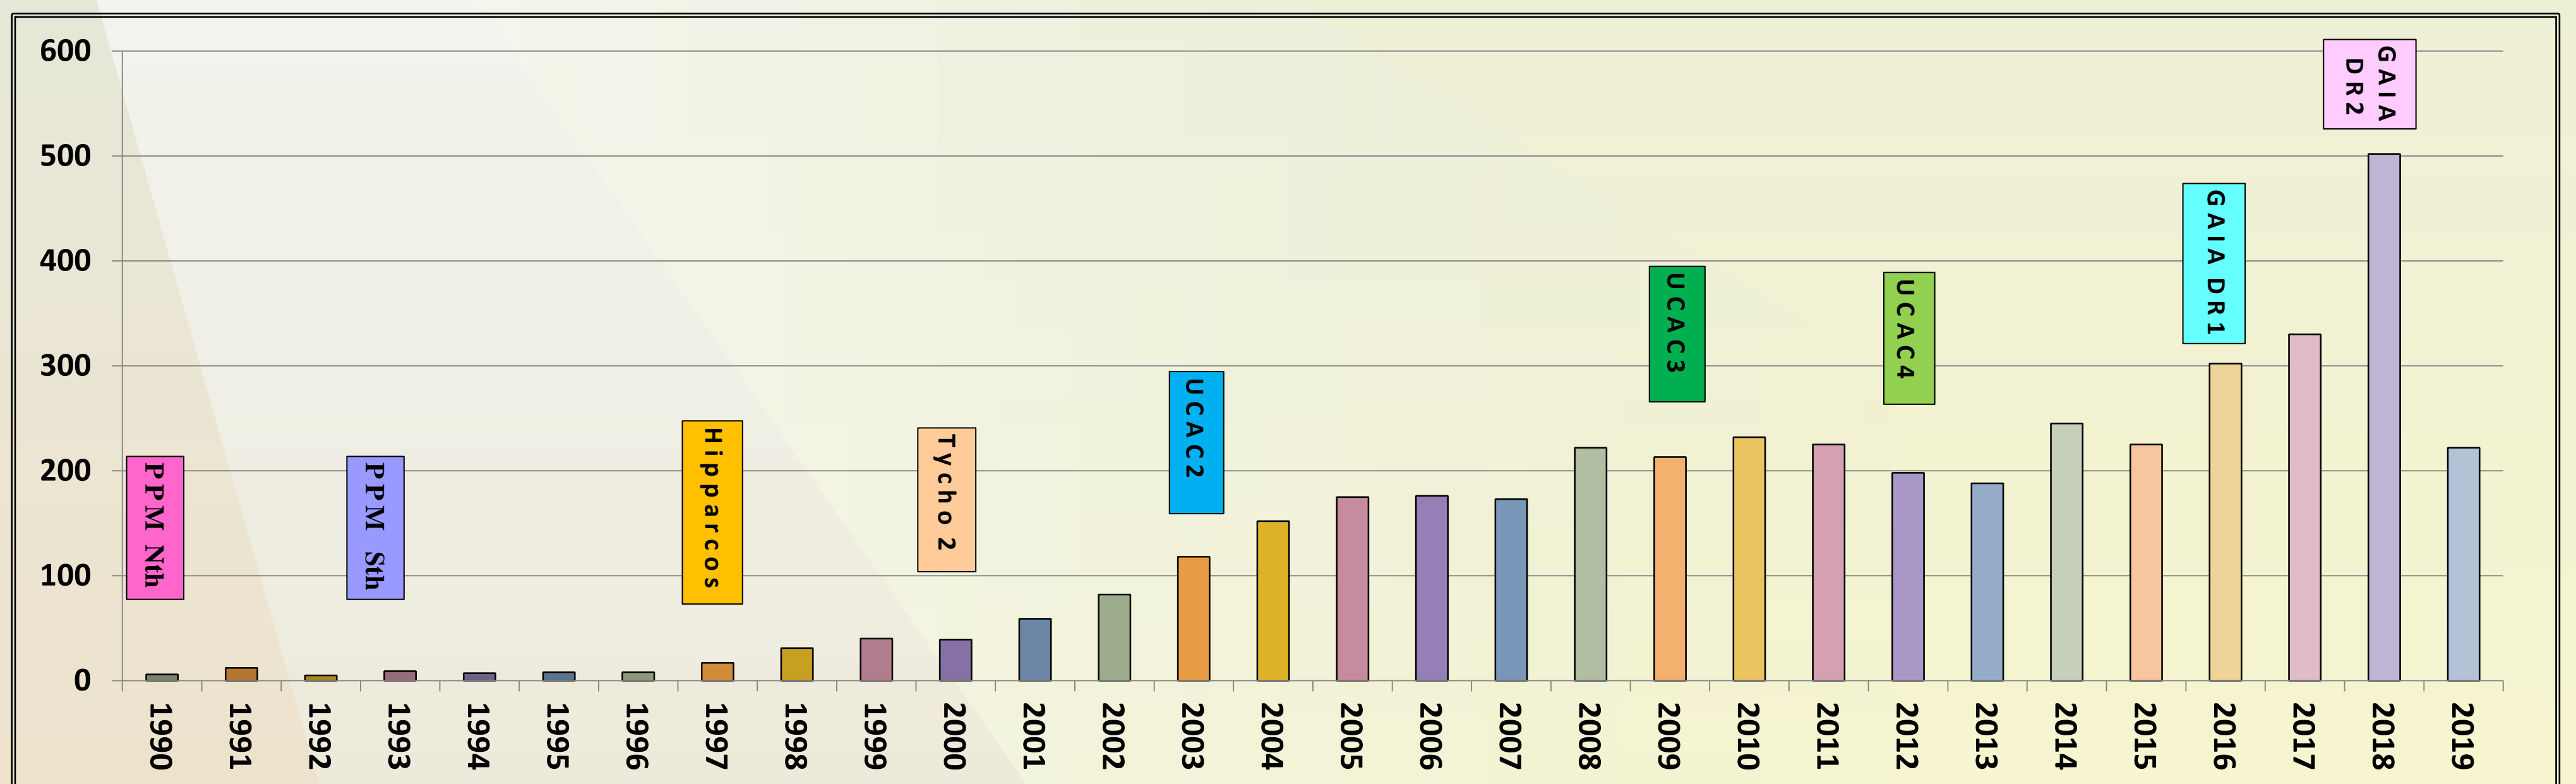

Dave Herald

drherald@bigpond.net.au

RASNZ Occultation Section, IOTA

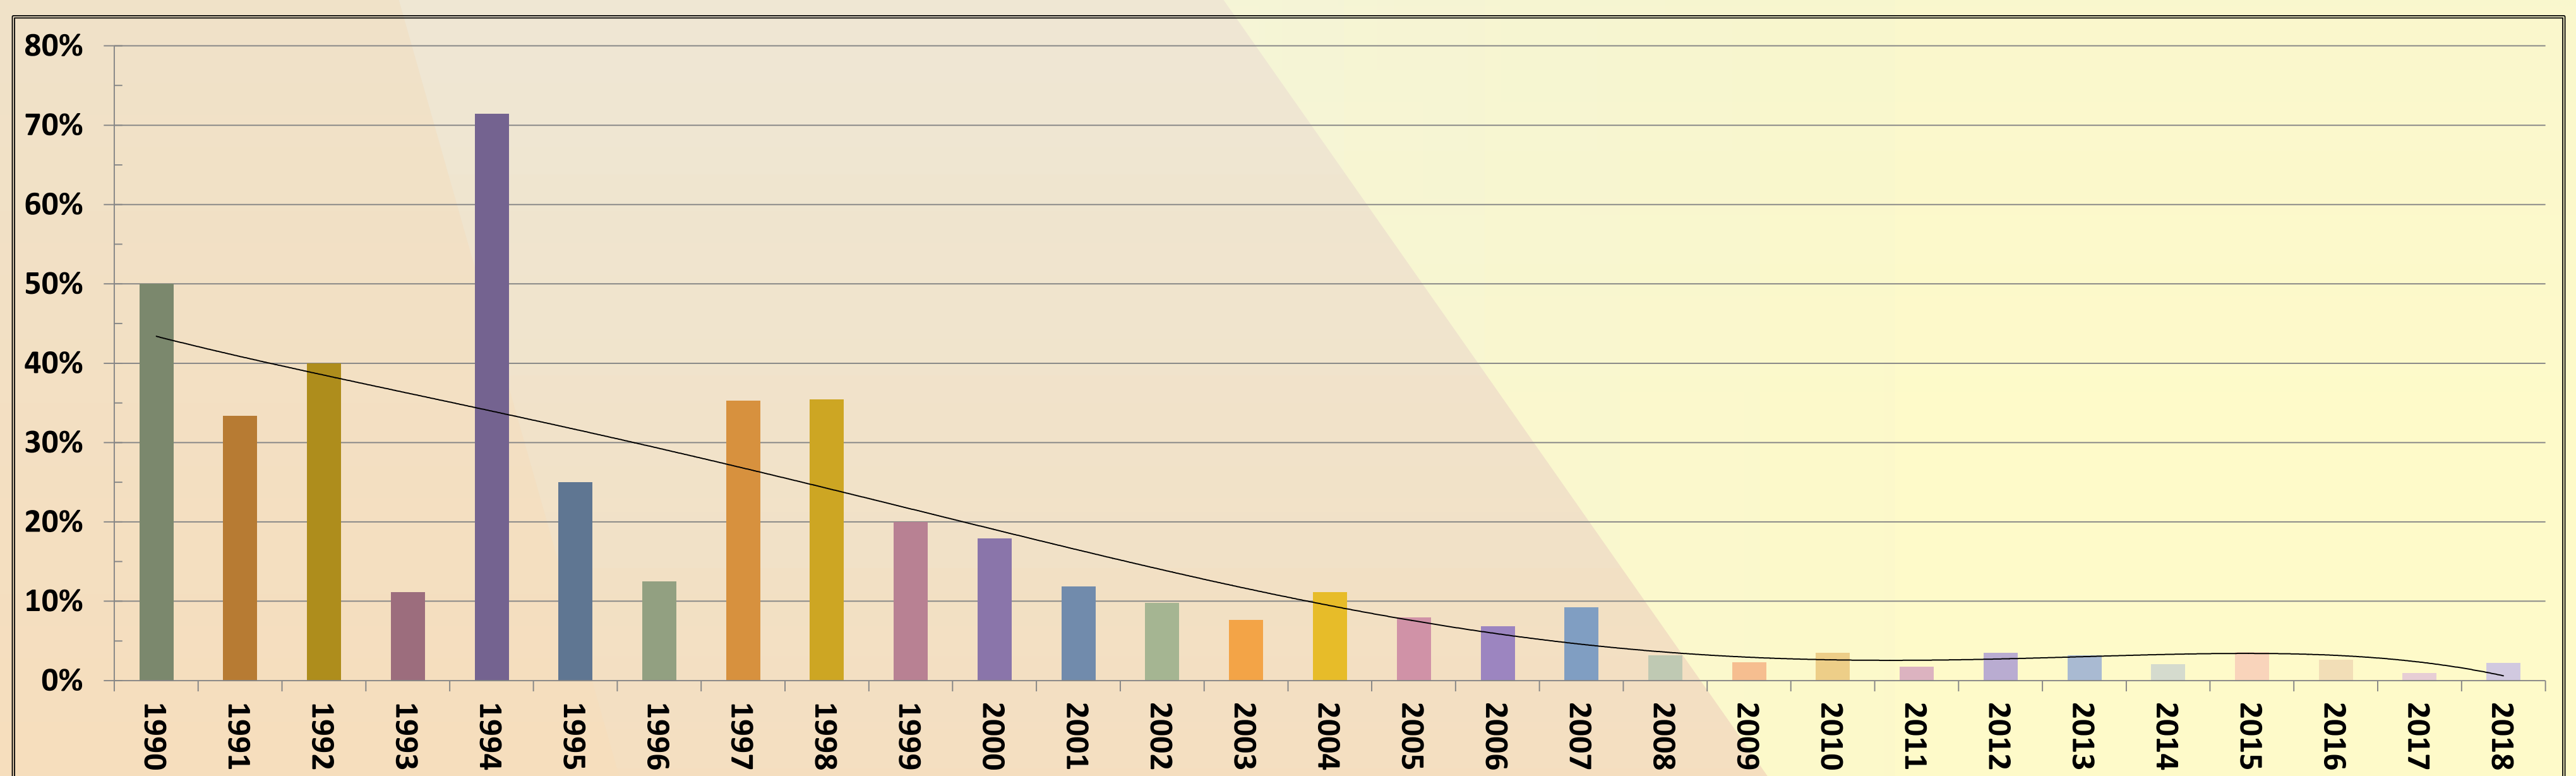

This statistical data was obtained following a review of the entire back file of asteroidal occultations (by *Dave Herald and Dave Gault*)

Number of occultations by year, together with catalogue availability

2019 - to
about April

Percent of events that were 'un-useable'

Unusable events in these years are mainly
'false' observations

Unusable events in these years are mainly
incomplete observations, or inconsistent observations

Distribution of events by region - showing the change over 10 years
